1. **Configuration dependence of moments of inertia in the odd-A nucleus from BCS theory**
Zhou SG, Zheng CK, Hu JM
PHYS REV C 63 (4): art. no. 047305 APR 2001

2. **Exploration of unbound states by analytical continuation in the coupling constant method within relativistic mean field theory**
Yang SC, Meng J, Zhou SG
CHINESE PHYS LETT 18 (2): 196-198 FEB 2001

3. **Garvey-Kelson mass relations and n-p interaction**
Gao ZC, Chen YS, Meng J
CHINESE PHYS LETT 18 (9): 1186-1188 SEP 2001

4. **Reflection asymmetric shell model on the projected woods-Saxon+BCS basic**
CAO Zao-Chun,CHEN Yong-Shou,MENG Jie
CHINESE PHYS LETT 18 (12)1564-15767 SEP 2001

5. **How and when will a neutron star become a hyperon star?**
JIA Huan-Yu,SUN Bao-XI.MENG Jie,ZHAO En-Guang
CHINESE PHYS LETT 18 (12)1571-1574 SEP 2001

6. **Skyrme-Hartree-Fock description of the nuclear structure in Ca isotopes (II) Neutron halo, skin and particles in the classically forbidden area**
Im S, Meng J, Zhou SG, et al.
HIGH ENERG PHYS NUC 25 (5): 405-411 MAY 2001

7. **Skyrme-Hartree-Fock description of the nuclear structure in Ca isotopes (I) binding energy and shell effects, radii and density**

distributions
Im S, Meng J, Zhou SG, et al.
HIGH ENERG PHYS NUC 25 (4): 322-328 APR 2001

8. **Magnetic rotation physics -Shears bands and chiral doublets**
J. Meng and S.Q. Zhang
Nucl. Phys. Rev. 2, 65-71 (2001)

9. **The effect of hyperon-hyperon interaction on neutron stars**
Sun BX, Jia HY, Meng J, et al.
COMMUN THEOR PHYS 36 (4): 446-448 OCT 15 2001
